Why Choose Keystone?

AMERICAN-MADE WORLD CLASS MANUFACTURING

Keystone is proud to be American-Owned and Made. We manufacture our products across the country at numerous manufacturing facilities.

NETWORK OF DEALERS & AUTHORIZED CONTRACTORS

You can find our products throughout the country, with sales locations that service both contractors & dealers. We have a valued dealer network who are knowledgeable about our products and have our products on display. We take great pride in providing in-depth regional training programs for contractors to become Authorized Keystone Hardscapes Contractors. To connect with a dealer or authorized contractor in your area, please visit keystonehardscapes.com

EXPERIENCED PROFESSIONAL ADVICE

We are more than your supplier, we are your partner. We recognize the importance of sales support and inventory. We have a phenomenal team that's trained to be your resource. Our knowledgeable staff provides expertise from sales support and installation techniques, to delivery.

Find your authorized contractor today

Simply open the camera app on your phone and scan the code to get in touch with our contractors.

Our goal is to provide you with quality paver & wall products for your project. We understand that it's a large investment. If you need help with finding the right contractor for your project, we can help. Our goal is to recommend qualified, knowledgeable hardscape contractors. The hardscape contractors found on our Keystone Authorized Contractor list have shown a proven knowledge on the basics of paver and retaining wall construction and installation. Each company listed has at least one individual on staff that has attended our two-day training course and passed our Installer Exam.

While we try our best to recommend qualified contractors for your project, Keystone does not guarantee the workmanship of the installer. Please ask your selected contractor for references and about any warranty or guarantees they might provide on workmanship.

FOLLOW THESE STEPS TO SELECT THE IDEAL CONTRACTOR TO BRING YOUR PROJECT TO LIFE.

STEP ONE

It's always a good idea to interview several contractors and find the best match for your project and personality. The contractor you choose will be at your project for days or weeks. Talk about working hours, how many people to expect at the project, what kind of equipment they will be using. Make sure you have a good rapport with the person and communicate your wants and needs.

Make sure to ask if they are a Keystone Hardscapes Authorized Contractor.

STEP TWO

Once you decide on the work you want to complete, confirm that the contractor has done that type of work in the past. Ask for pictures, references, or go by other projects they have completed and make sure you are happy with their quality of work.

STEP THREE

Once you reward the project to a specific contractor, get a written contract of the work to be performed. Make sure you understand the scope of your project and that any changes midway through the project, could result in additional costs to the project.

STEP FOUR

Once your project is complete, we would love to see finished photos! Photos can be submitted to Keystone Hardscapes at photos@keystonehardscapes.com. Photos may be used in social media or future catalog publications.

Utilize our network of authorized contractors to build your happy place

We have a valued distributor network throughout the country who are knowledgeable about our products and have our products on display. We take great pride in providing in-depth regional training programs for contractors to become Authorized Keystone Contractors.

PAVER INSTALLATION GUIDE

1

Excavate unsuitable, unstable or unconsolidated subgrade material and compact the area which has been cleared. Backfill and level with dense graded aggregate suitable for base material - typically a minimum 4 inch to 8 inches thick (102mm - 203mm). Compact base to optimum moisture/density or as otherwise directed by site engineer/architect/landscape architect.

2

Place bedding course of washed sand conforming to the grading requirements of ASTM C 33 to a maximum uniform depth of 1-1 1/2 inch (25-38mm). Screed to the grade and profile required.

3

Install pavers with joints to a nominal 1/8 inch (3mm).

4

Where required, cut pavers with an approved cutting device to fit accurately, neatly, and without damaged edges.

5

Compact using a plate compactor with neoprene mats attached to the compactor or use a rubber roller compactor. Alternatively compact with a standard steel plate compactor using sheets of plywood on top of the paving units. Do not compact paving units directly on top with a standard plate compactor.

6

Post-compaction, spread and sweep dry ASTM C 33 or ASTM C 144 sand over the entire paving area.

7

Make one more pass with the plate compactor using neoprene mats, rubber rollers, or plywood to completely fill the joints with sand.

8

Sweep paver surface clean for final acceptance by owner/owner's agent.

**TYPICAL
CROSS SECTION
OF CONCRETE
PAVER INSTALLATION**

Complete installation and specification details are available by contacting your Willamette Graystone Sales Representative.

THE NATURE OF EFFLORESCENCE

Another cause of color variation in paving stones and wall stones may be the natural phenomenon called efflorescence. Efflorescence, a deposit of white salts consisting of mostly calcium carbonate, may appear as a white powder on the paver or wall surface and in no way affects the structural integrity. This phenomenon occurs in all concrete and although it cannot be completely prevented from occurring, efflorescence generally will weather off and disappear over time or can be removed with cleaners at the job site.

COLOR VARIATIONS

As in all natural materials, color in paving stones and wall stones has inherent variations. Paver and wall colors are affected by the variances in the raw materials, concrete mixture, moisture content, climactic conditions, and other variations. Therefore, the colors shown are approximate representations of paver and wall colors, but should not be expected to be an exact match of what will be delivered.

ACCESSORIES

Since 1940, The QUIKRETE® Companies have produced more than 200 professional-grade and consumer products. Through these product lines, the QUIKRETE® Companies offer a variety of mixes that will allow you to complete your outdoor kitchen project quickly and efficiently. Most plants stock a limited amount of bagged concrete mix from QUIKRETE® such as:

CONCRETE MIX (#1101): QUIKRETE® Concrete Mix is a pre-blended mixture of cement and aggregates for general structural uses, requiring only the addition of water.

Use For: Foundation Walls and Footings • Sidewalks • Curbs • Steps • Ramps • Walkways

COUNTERTOP MIX (#1106-80): QUIKRETE® Countertop Mix is a specially formulated flow-able high-strength concrete mix for pre-cast and cast-in-place concrete countertop applications.

Use For: Countertops

PLAY SAND (#111351): Quikrete 50 lb. Play Sand is a specially graded, washed sand that has been dried and screened. It is ideal for children's play sand boxes, molding and building.

Use For: Sand Boxes • Molding • Building • Landscaping

COMMERCIAL GRADE POLYURETHANE CONSTRUCTION ADHESIVE: High-performance, commercial grade adhesive designed for permanently bonding concrete, brick, marble, stone, wood, glass, aluminum, steel, PVC and tile.

Use For: Repairing broken concrete • Bonding retaining wall block and caps

NATURAL LOOK SEALER: Water-based penetrating silicone sealer waterproofs and protects concrete, brick, masonry, pavers, and stucco surfaces. Clear sealer does not change the surface appearance. Seals from water, salts, and oils. UV Resistant.

Use For: Driveways • Patios • Walls • Sidewalks • Pre-stress panels • Retaining walls • Tunnels • Loading docks • Bridge columns • Tunnels • Curbs/steps

WET LOOK HIGH GLOSS SEALER: Water-based penetrating silicone sealer waterproofs and enhances the color of concrete, masonry, brick, paver, and natural stone surfaces. Seals from acids, grease, food stains, oil, salt, and more. UV resistant.

Use For: Decorative concrete • Pavers • Natural stone • Exposed aggregate • Brick • Stucco

POLYMERIC SAND: Polymeric Sand is a precise mixture of polymer binders and clean natural sand. Polymeric Sand will bond with the pavers/stones adding strength to the joint as well as reliability to the pavement system. It is ideal for use on any paver surface such as sloping areas, driveways, patios, pool decks, sidewalks, etc.

Use For: Driveways • Sidewalks • Pool decks • Patios

Contact Your Local Representative for availability on the full line of QUIKRETE® products such as bagged concrete mixes, concrete repair products, and masonry products.

PORTLAND LIME & SAND MORTAR: SPEC MIX® Portland Lime & Sand mortar is a dry pre-blended mortar mix containing Portland cement, hydrated lime and dried masonry sand formulated for superior bond, water retention, and board life.

Product Warranty

LIMITED WARRANTY for the Homeowner Purchaser

Keystone Hardscapes, having its headquarters located at Five Concourse Parkway, Atlanta, GA 30328, warrants its products to be of merchantable quality if installed in accordance with applicable ICPI (www.icpi.org) or NCMA (www.ncma.org) standards. The product is not warranted as suitable for any use or purpose other than for residential application and the purpose for which the product is generally intended. This warranty does not cover standard manufacturing variations, color variations/matching or efflorescence. Keystone Hardscapes is not responsible for installation of the product or defective conditions caused by installation, abuse, impact, abrasion or alteration of the product, earth-shifts, excessive or unforeseen site conditions, acts of God or application of de-icing salt or other chemicals to the product. Liability under this warranty, if the product is found to be defective, is LIMITED to the replacement of the defective product, or at Keystone Hardscapes' option, the refund of the purchase price of the defective product. Keystone Hardscapes does not guarantee that the shape or color will be available in the future and will provide an alternate shape or color from its current product line as determined by Keystone Hardscapes at the time of an accepted warranty claim. **This warranty is valid for the lifetime of the product. This warranty is transferable. In the event of a claim under this warranty, notice must be given to Keystone Hardscapes, together with original proof of purchase, at its headquarters by sending a letter to: Keystone Hardscapes a/s Warranties, Five Concourse Parkway, Atlanta, GA 30328. THIS WARRANTY IS ISSUED AND ACCEPTED IN LIEU OF ANY AND ALL OTHER EXPRESS WARRANTIES AND EXPRESSLY EXCLUDES LIABILITY FOR LABOR, FREIGHT AND OTHER COSTS ASSOCIATED WITH REMOVAL AND REPLACEMENT OF THE DEFECTIVE PRODUCT AND FOR INDIRECT AND CONSEQUENTIAL DAMAGES.**

Due to variations in the printing and photographic processes, actual appearance and color of our products may differ from the appearance reflected in this website or in any of our brochures or other product literature and appearance and color may differ from one brochure or other product literature to the next. Please be advised that this warranty does not cover those appearance and color variations. Once installed, our products are deemed accepted in terms of surface texture, shape, size, split face geometry, color, color blending and all other aesthetic features.

QUIKRETE and its subsidiaries (collectively QUIKRETE) reserve the right to improve its products and make changes to its specification and design without notice. The information contained herein has been compiled by QUIKRETE and to the best of its knowledge, accurately represents Keystone Hardscapes products and how it may be used in the applications which are illustrated. Site conditions, including load pressures acting on the wall, soil types and drainage conditions, may vary. Final determination of the suitability of the product for the use contemplated and the manner of product use are the sole responsibility of the user. Good construction practices and local building codes require the use of an engineered design when constructing retaining walls or freestanding walls in many conditions. Structural design and analysis should be provided by a qualified engineer.
