A backyard sanctuary to relax and recharge, a gathering space to entertain family and friends, a stunning driveway and walkways to make a great first impression... every day Keystone Hardscapes helps turn dreams like these into realities.

At Keystone Hardscapes, we are committed to providing unrivaled product selection, quality and customer service. Since the 1980s, our products have been installed in thousands of residential and commercial properties. Our innovative and versatile paving, wall and outdoor living elements continue to be favorites of homeowners, contractors, designers and developers alike.

Keystone Hardscapes is where beauty and functionality meet; where outdoor dreams come to life.

Locally made products, nationally trusted brand. No need to put off until tomorrow what we can build together today. Trust us to help transform your residential or commercial property.

Venetian Flag is great for the customer who desires a look of flagstone without the high cost. Venetian Flag has several design features unmatched by industry standards including a pattern that is virtually undetectable and that starts easily along a straight edge or string line. Venetian - Flag self-terminates on 2’ centers and makes a continuous 4’ wide walkway with zero cuts.

A uniquely attractive cleft surface sets Venetian apart from ordinary pavers. This texture allows for a dynamic interaction with sunlight and evokes the timeless beauty of flagstone. The larger scale of Venetian pavers lends itself to both stately residential settings and more expansive commercial applications.

HOLLAND STONE

With the renowned durability of interlocking pavers, Holland Stone offers the Old World charm of a simple paver shape. The rectangular shape of Holland Stone can be installed in a number of fascinating patterns to produce simple or intricate designs. Mix these patterns with any of the available standard colors or combination of colors and you’ve got the potential for an architectural effect limited only by the imagination.

Plaza Stone is a timeless paving stone with an impressionistic embossed surface profile. It creates a gentle and warm effect by combining soft curved edges with rectangular and square stones. Plaza Stone is available in many colors to accommodate the most discriminating tastes. Plaza Stone uses large-scale patterns to create interest and drama for commercial landscaping, while the stone’s texture and pattern harmonize with surrounding buildings and site furnishings.

The ADA Detectable Warning Paver is an additional guidance provision for wheelchair and pedestrian access to streets, sidewalks and other components of the public right of way. This product will help ensure local jurisdictions and other entities that their facilities are accessible to people with physical or sensory disabilities. The ADA Detectable Warning Paver provides visual as well as textural contrast to conventional publicly utilized pavements.

The Coping Stone is designed to complement any concrete paver stone pedestrian application. It can be used for pool coping, step treads and decorative patio borders. It allows the designer consistency in the paver pavement’s visual edge. This consistency will provide confidence that the edge profile will parallel with the finished project paving surface.

Eco-CityLock series is an innovative and unique narrow modular permeable paver system that parallels today’s trend of architectural alignment and visual direction. In addition to the contemporary aesthetics, the product also delivers a sustainable, permeable pavement surface. The structural interlocking spacer bars contribute resistance for premium vertical, horizontal and rotational interlock of the neighboring units. The arrangement of design intent and environmental balance case a creative solution for adding aesthetics to site work storm water management solutions.

The Eco-Panorama series features rectilinear shapes, riven surfaces, and rounded edges which recall the timeless appeal of weathered cut flagstone. These permeable pavers perform as structural pavement and reduce or eliminate storm water detention. These pavers provide 100% pervious surfaces that infiltrate, filter, and decrease storm water runoff rates and pollutant loads.

Grasstone II is a versatile surface stabilization product used for both sloped and horizontal applications. The Grasstone II grid paver provides a sustainable solution to surface erosion, allowing infiltration of water and the ability to establish vegetation. Grasstone II reinforces grass areas by providing a concrete matrix support combined with topsoil and vegetative cover. This system can provide substantial pavement strength to minimize rutting and create a suitable platform for intermittent vehicular use. Grasstone II has been used extensively for vegetated fire lane pavements when designed and constructed according to conventional pavement design.

Make your driveway an ecologically friendly place with this attractive and durable design option. SF RIMA reduces your impact on the environment by allowing rainwater drainage through a permeable pavement system. Strong enough to support vehicular traffic, this pavement allows for precious groundwater to recharge continually.

Excavate unsuitable, unstable or unconsolidated subgrade material and compact the area which has been cleared. Backfill and level with dense graded aggregate suitable for base material – typically minimum 4 inch to 8 inches thick (102mm - 203mm). Compact base to optimum moisture/density or as otherwise directed by Site Engineer/ Architect/Landscape Architect.

Place bedding course of washed sand conforming to the grading requirements of ASTM C 33 to a maximum uniform depth of 1-1/2 inch (25-38mm). Screed to the grade and profile required.

Install pavers with joints to a nominal 1/8 inch (3mm).

Where required, cut pavers with an approved cutting device to fit accurately, neatly, and without damaged edges.

Compact using a plate compactor with neoprene mats attached to the compactor or use a rubber roller compactor. Alternatively compact with a standard steel plate compactor using sheets of plywood on top of the paving units. Do not compact paving units directly on top with a standard plate compactor.

Post compaction, spread, and sweep dry ASTM C 33 or ASTM C 144 sand over the entire paving area.

Make one more pass with the plate compactor using neoprene mats, rubber rollers, or plywood to completely fill the joints with sand.

Sweep paver surface clean for final acceptance by owner/owner’s agent.

Complete installation and specification details are available by contacting your Willamette Graystone Sales Representative.

THE NATURE OF EFFLORESCENCE
Another cause of color variation in paving stones and wall stones may be the natural phenomenon called efflorescence. Efflorescence, a deposit of white salts consisting of mostly calcium carbonate, may appear as a white powder on the paver or wall surface and in no way affects the structural integrity. This phenomenon occurs in all concrete and although it cannot be completely prevented from occurring, efflorescence generally will weather off and disappear over time or can be removed with cleaners at the job site.

COLOR VARIATIONS
As in all natural materials, color in paving stones and wall stones has inherent variations. Paver and wall color is affected by the variances in the raw materials, concrete mixture, moisture content, climactic conditions, and other variations. Therefore, the colors shown are approximate representations of paver and wall colors, but should not be expected to be an exact match of what will be delivered.

The 3" and 6" high Harington 3-pc retaining wall systems evoke the texture and look of natural stone, making a striking architectural statement. The hand-hewn facing creates a stone-like appearance while the rear lip eliminates setback and alignment issues to speed construction. Available in blended earth tone colors, these retaining wall units are a reliable, easy-to-install alternative to natural stone walls.

WALL CAPS & STEPS

Add the perfect finishing touch of architectural detail with wall caps. The smaller scale of the caps combine with the larger scale wall unit to give the completed installation a distinctive and unique appearance. The Step Tread has a traditional, straight split which creates a clean, natural look and easily makes code-compliant riser/tread dimensions.

LIMITED LIFETIME GUARANTEE OF QUALITY

LIMITED TO MANUFACTURING DEFECTS ONLY! With respect to all its products Willamette Graystone warrants that at the time of its delivery of its products, its products conform to any ASTM specification then applicable to the particular product. This warranty extends to all persons in the original chain of distribution from the manufacturer to the owner of the property when and where the products are first installed. Because Willamette Graystone products are manufactured using mined materials, there may be color variations in products from the same manufacturing run as well as in products from different runs. In addition, efflorescence may result from the naturally occurring chemical reaction between the product and the air around it. Accordingly, no guarantee of color shades is made or implied. Minor imperfections in shape, appearance or dimensions are not considered to be defects in material or workmanship. Willamette Graystone does not guarantee that the shape or color will be available in the future and will provide an alternate shape and/or color from its current product line as determined by Willamette Graystone in its sole and absolute discretion at the time of an accepted warranty claim. The warranty is voided with respect to any products that have been damaged due to handling, wall design, installation, contact with chemicals (such as deicers), earth shifts or acts of God. Any product defect that is detected or is noticeable prior to installation. All claims against defective products that are received on site must be made within 10 days from date of shipment from Willamette Graystone. Willamette Graystone will replace product or, if unavailable, an alternate product as determined by Willamette Graystone in its sole and absolute discretion, at no charge. Willamette Graystone will replace uninstalled pavers or site if more than 5% of the product is defective. WILLAMETTE GRAYSTONE WARRANTY IS LIMITED TO THE COST OF REPLACEMENT PRODUCT ONLY AND DOES NOT INCLUDE ANY OTHER COSTS INCLUDING THE COST OF LABOR FOR REPLACEMENT. WILLAMETTE GRAYSTONE WILL NOT PAY ANY LABOR COSTS RELATED TO THE REPLACEMENT OF DEFECTIVE PRODUCTS INSTALLED. Installation costs remain the responsibility of the buyer. There are no warranties beyond this expressed warranty. Our warranty excludes any liability for lost profit any other indirect, special or consequential damages. Our warranty excludes any liability or warranty for misuse or misapplication of products. This warranty extends only to the original end user and is not transferable. Willamette Graystone warranty is limited to the structural integrity of the product and does not include the following: Imperfections commonly found in concrete products, such as exposed aggregates, small chips or cracks and varying surface textures. Efflorescence or its removal. Efflorescence is a natural occurrence in concrete products and usually washes or wears off over time. Shade or color blend variations between the product units. Damage caused by intentional abuse. Abnormal wear and tear, such as surface stains, erosion from water, damage from lawn and garden equipment. Shade variations between products and samples or photographs. Freight of replacement products. Use of concrete grid paving units, interlocking concrete paving units, or coping units beyond the applications described in the applicable ASTM standards, Interlocking Concrete Pavement Institute standards, or Willamette Graystone product information.
Since 1940, The QUIKRETE® Companies have produced more than 200 professional-grade and consumer products. Through these product lines, the QUIKRETE® Companies offer a variety of mixes that will allow you to complete your outdoor kitchen project quickly and efficiently. Most plants stock a limited amount of bagged concrete mix from QUIKRETE® such as:

**CONCRETE MIX (#1101) – QUIKRETE®**
Concrete Mix is a pre-blended mixture of cement and aggregates for general structural uses, requiring only the addition of water.

*Use For:* Foundation Walls and Footings • Sidewalks • Curbs • Steps • Ramps • Walkways

**COUNTERTOP MIX (#1106-80) – QUIKRETE®**
Countertop Mix is a specially formulated flowable high-strength concrete mix for pre-cast and cast-in-place concrete countertop applications.

*Use For:* Countertops

**JOINTING SAND (#1151) – QUIKRETE®**
Paver Jointing Sand is a properly graded fine sand for filling joints between interlocking pavers, flagstone, brick and patio block.

*Use For:* Patios • Walkways • Driveways • Any Paver Application

**COMMERCIAL GRADE POLYURETHANE CONSTRUCTION ADHESIVE –**
High performance, commercial grade adhesive designed for permanently bonding concrete, brick, marble, stone, wood, glass, aluminum, steel, PVC and tile.

*Use For:* Repairing broken concrete • Bonding retaining wall block and caps

**NATURAL LOOK SEALER –**
Water-based penetrating silicone sealer waterproofs and protects concrete, brick, masonry, pavers, and stucco surfaces. Clear sealer does not change the surface appearance. Seals from water, salts, and oils. UV Resistant.

*Use For:* Driveways • Patrols • Walls • Sidewalks • Pre-stress panels • Retaining walls • Tunnels • Loading docks • Bridge columns • Tunnels • Curbs/stepping

**WET LOOK HIGH GLOSS SEALER –**
Water-based penetrating silicone sealer waterproofs and enhances the color of concrete, masonry, brick, paver, and natural stone surfaces. Seals from acids, grease, food stains, oil, salt, and more. UV resistant.

*Use For:* Decorative concrete • Pavers • Natural stone • Exposed aggregate • Brick • Stucco

**POLYMERIC SAND –**
Polymeric Sand is a precise mixture of polymer binders and clean natural sand. Polymeric Sand will bond with the pavers/stones adding strength to the joint as well as reliability to the pavement system. It is ideal for use on any paver surface such as sloping areas, driveways, patios, pool decks, sidewalks, etc.

*Use For:* Driveways • Sidewalks • Pool decks • Patios

Contact Your Local Representative for availability on the full line of QUIKRETE® products such as bagged concrete mixes, concrete repair products, and masonry products.

**PORTLAND LIME & SAND MORTAR – SPEC MIX®**
Portland Lime & Sand Mortar is a dry pre-blended mortar mix containing Portland cement, hydrated lime and dried masonry sand formulated for superior bond, water retention, and board life.

**LANDSCAPE FABRIC**

**GEOTEXTILES AND EDGE RESTRAINT**

**GEOGRID**

**EDGE RESTRAINT**

**SPEC MIX®**

QUIKRETE and its subsidiaries (collectively QUIKRETE) reserve the right to improve its products and make changes to its specification and design without notice. The information contained herein has been compiled by QUIKRETE and to the best of its knowledge, accurately represents Keystone Hardscapes products and how it may be used in the applications which are illustrated. Site conditions, including load pressures acting on the wall, soil types and drainage conditions, may vary. Final determination of the suitability of the product for the use contemplated and the manner of product use are the sole responsibility of the user. Good construction practices and local building codes require the use of an engineered design when constructing retaining walls or free-standing walls in many conditions. Structural design and analysis should be provided by a qualified engineer.
