

Visit Our Showrooms To See Aqua-Bric® 4 On Display

HIGHLIGHTS/RECOMMENDED USE

PATIOS, WALKWAYS, DRIVEWAYS, PARKING LOTS & PLAZAS
REDUCES OR ELIMINATES STORM WATER RUNOFF

Aqua-Bric® 4 permeable interlocking concrete pavers allow storm water drainage and groundwater recharge, while capturing first flush and pollutants. When designed and installed in accordance with Interlocking Concrete Pavement Institute (ICPI) guidelines, the permeable pavement system becomes an accepted post-structural best management practice that meets federal storm water management requirements. Streets, plazas, driveways, and parking lots constructed using Aqua-Bric® 4 are economically smart and structurally sound. Aqua-Bric® 4 comes with a stone texture and is available with or without false joints.

AQUA-BRIC® 4 FULL PIECE

Pcs per sq. foot: 2.88
Height: 80mm (3 1/8 in)
Length: 254mm (10 in)
